

# FIRST CALL FOR PAPERS

Submit your paper online starting October 1, 2006

<http://congress.phys.msu.ru/lals07/>

Join your colleagues in Moscow, Russia, at the most prestigious, peer-reviewed, international conference in 2007, which is the leading event in the area of laser applications in life sciences, at the edge of laser physics, photochemistry, photobiology, photobiomedicine, and biophotonics. History of the LALS series goes back to 1986.

Abstract & Summary deadline:  
December 20, 2006 (Noon ET)

LALS 2007 will be held in Moscow, Russia, capital of the Russian Federation and one of the biggest cities in the world. Moscow's origin as a symbol of Russia goes back 850 years. Not exactly a pretty capital but one of great contrasts and constant change, Moscow contains a collection of stunning, iconic buildings at its heart - a record of Russia's amazing, turbulent history from medieval times, through Tsarist excess to communist simplicity and back to excess again. Moscow's cultural treasures are spectacular, diverse and unique, while the confusing, capitalist chaos and new neon life gives Moscow a potent and exciting dynamic.
